# Chariot BTT

The Chariot Smart Bluetooth Tag can be used for stand-alone applications or expand on the Chariot Smart Drive IoT capabilities, offering endless possibilities in actionable intelligence. Chariot BTT is a multi-sensor tag that is easy-to-configure and allows for remote monitoring and control of variables including temperature, motion, humidity, light and free-fall impact.

high value monitoring

Link up to 100 tags.
Monitor assets and goods.

driver ID

Identify drivers.
Ensure only authorized access.

cold chain temperature

Access to real-time
temperature readings.

KEY FEATURES INCLUDE:

- Built-in motion sensor with smart power management
- Built-in motion sensor and free fall detection
- Built-in temperature sensor
- Built-in ambient light sensor
- Built-in humidity sensor
- Replaceable battery
- High-end remote API interaction for IoT connected apps
- LED indicator
- Portable design and ruggedized enclosure
