# Chariot Satcom

Get satellite connectivity for your Chariot Smart Drive. The Satcom is easy to programme and manage via the Asset Aware IoT gateway. It's ideal for critical scenarios and activities that rely on accurate, real-time communications.

visibility

Continued connectivity through Iridium satellite communication.

compliance

Ensures your workforce remains compliant and safe.

lowest cost routing

Conserve costs. Automatic and efficient data management.

KEY FEATURES INCLUDE:

- Global operating capability using the Iridium Satellite network
- RS-232 transparent communication with Chariot Smart Drive/ compatible with Chariot Tri-Port Serial Expander
- Fully programmable / configurable trigger events depending on cellular coverage; automatic switching between 4G/GPRS and Satellite Network for data optimization
- Two way communication with Asset Aware web server application
- Fully-integrated and compatible with Asset Aware IoT ecosystem for custom script reporting configurations
- Total control of satellite data usage
- High gain, low-profile, external Iridium antenna
